

SUBJECT INDEX TO VOLUME 6

- Acetylcholine receptors423
 tau phosphorylation in423
- Acute coronary syndromes564
 genetic markers in565
 hemostatic markers in564
- Acute *Plasmodium falciparum* infection157
 patterns of anemia in157
- Advanced glycation end-products (AGEs)351
 formation in body351
 in diabetic neuropathy354
 in diabetic retinopathy353
 receptor for352
- Airway remodeling831
 angiotensin-1 in836
 vascular endothelial cell growth factor in ...833
- Alzheimer's disease (AD).....119
 apoptosis in126
 dysregulation in calreticulin expression in .122
 ER calcium dyshomeostasis hypothesis in 121
 insulin metabolism in127
 oxidative stress in126
 role of trace metals126
 unfolded protein response (UPR) in122
- Amyloid/cholinergic receptors425
- Amyloid interactions426
 TAU protein with426
- Anaplastic astrocytomas647
- Angiogenesis460
 angiogenic factors in461
 angiostatic factors in461
- Angiotensin-1831
 immunomodulatory role of831
 in airway remodeling831
 in angiogenesis832
 in microvascular remodeling832
- Anti-apoptotic proteins100
 ER functions of100
 localization of100
- Antiestrogens362
 action of362
 in adrenocortical cancer364
 in breast cancer363
 in cancers364
 in colon cancer364
 in hormone-dependent cancers363
 in lung cancer364
 in ovarian cancer364
 in prostate cancer364
 in uterus cancer363
 MM therapy by364
 structure of362
- Anti-inflammatory markers561
- Antimalarials247
 malarial parasites vs.247
- Antiplatelet therapy603
 for non-ST-elevation MI/unstable
 angina603,608
 glycoprotein IIb/IIIa inhibitors in606
 thienopyridines in604
- Antithrombotic therapy603,609
 for non-ST-elevation MI/unstable
 angina609,611
 thrombin inhibitors in613
 unfractionated heparin in609
- Apoptosis18,375,493
 as substrate for thrombogenic material493
 as therapeutic tool384
 elements of375
 implications for therapy375
 in allergic contact dermatitis379
 in atopic dermatitis379
 in cutaneous malignancies382
 in keratinocytes377
 in lupus erythematosus (LE)379
 in malignant melanoma383
 in non-melanoma skin cancer (NMSC)382
 in physiological/pathological skin375
 in psoriasis378
 in skin376
 in skin diseases378
 role of cidofovir386
 role of dithranol (anthralin)385
 role of gene therapy391
 role of imiquimod386
 role of methotrexate (MTX)385
 role of passive immunotherapy388
 role of specific immunotherapy (ASI)389
 role of tazarotene388
 role of UV light384
 role of vitamin D₃ analogs387
 terminal differentiation in376
- Apoptotic cell death111,112
- Apoptotic resistance61
 PERK in hypoxia tolerance in61
- ASK1-MAP kinase87
 and death receptors89
 ER stress-induced activation of91
 in apoptosis91
 in A_β-induced neurotoxicity92
 in oxidative stress88
 in parkinsonism94
 mediated cell death in neurodegenerative
 disease87,92
 physiological roles in stress-induced
 apoptosis88
 signaling in ER stress87,90

ASK1-p38	94	virus infection	395
signaling in ALS	94	clinical management of	395,398
Atherogenesis	490	pathogenesis of	395
Atherosclerosis	489,545	risk factors of	395
biological targets to identify	545		
links between inflammation/ thrombogenicity in	489	<i>Caenorhabditis elegans</i> pRb-E2F pathway	709
role of contrast agents	545	Calcium	102
Atherosclerosis neovascularization	549	in cell death	102
computed tomography of	550	Calcium scoring	525
imaging of	549	significance of	527
molecular imaging of	552	Cancer	45,895,905
near-infrared fluorescence spectroscopic imaging of	552	drug development for	895
positron emission tomography of	551	notch signaling in	905
ultrasound of	552	regulation of Grp78 transcription in	46
Atherothrombosis	494	role of stress induction of GRP78/BiP	45
inflammatory role of platelets in	494	target for	895
Autophagic cell death	111	Cannabinoid	677
		drugs of	677
B cell antigen receptor (BCR)	291	in progressive neurodegenerative disorders	679
physiological roles of	291	mechanisms of protection by	681
B cell life/death decisions	293	medicinal indications of	678
role of microenvironmental factors	293	receptors for	677
role of T cell	293	Carcinomas	685
B cell transformation	295	stroma of	685
chronic antigen stimulation in	299	stromal elements released by	686
genetic factors for	295	Cardiac biomarkers	557
mechanisms of	295	for prediction/diagnosis of atherosclerotic disease	557
role of microenvironmental factors	300	in ACS	564
role of T cells	300	in acute coronary syndrome	562
BAX inhibitor-1	107	in chest pain	562
BAX/BAK proteins	106	lipoprotein associated	557,571
as apoptosis gatekeepers	106	Cardiovascular disease	481
BCL-2 family	99	determinant of susceptibility to	481
and BIK	104	prevention of	571
and BIM	105	role of high density lipoprotein cholesterol in	571
and NOXA	104	treatment of	571
and PUMA	105	Caspase-8	114
and spike	105	activation in HD	115
control of Ca ²⁺ homeostasis in cell by	102	CD40-deficient DC	635
mechanisms of	103	in T cell unresponsiveness	635
regulation of ER calcium levels by	102	Central nervous system	871
to control of mitochondrial-dependent apoptosis	99,106	modeling oxidative stress in	871
BH3-only proteins	103	trigger oxidative stress in	871
Biology	695	Cerebellum	429
networks in	695	alterations of biological features of	429
Blood coagulation	859	in sudden perinatal/infant death	429
alternative pre-mRNA splicing in	859	ontogenesis of	430
Bone diseases	395	Cervical cancer	795,803
associated with human immunodeficiency		E7 interactions with cellular	798
		inactivation of	795

- independent E7 activities799
 viral integration during803
 Chronic lung diseases409
 airway smooth muscle cell thickening in411
 EGF receptors in409
 EGFR/PDGFR kinase inhibitors in418
 Chronic lymphocytic leukemia665
 apoptosis in672
 autocrine regulation of survival in666
 B-cell proliferation in668
 CD38 as prognostic factor in671
 cell cycle deregulation in667
 chromosomal aberrations in667
 molecular pathogenesis of665
 nurse-like cells in669
 prognostic factors in670
 resistance to apoptosis in665
 role of BCR signaling in670
 role of T-cells669
 Colorectal carcinomas402
 epigenetic alterations in402
 genetic/epigenetic alterations in402
 phenotype (CIMP) of402
 Colorectal hyperplastic (serrated) polyps403
 epigenetic alterations in403
 Complicated malaria314
 Computed tomography (CT)525
 based angiography525
 of non-calcified plaque534
 technical considerations for526
 techniques for525
 Conditional replicative virus344
 carrier-restricted small RNA expression by .344
 Conformational diseases111
 Contrast-enhanced angiography531
 Corneal innate immunity327
 components of327
 Coronary calcium527
 detection/quantification of527
 significance of527
 Coronary heart disease589
 native type589
 peri-interventional type589
 statin therapy for589
 Coronary stenosis528
 diagnosis of528
 Costimulatory molecules845
 strategies to target845
 CpG island methylation401
 clinical applications of405
 genetic/epigenetic alterations in402
 in inflammatory diseases404
 in metaplastic processes of
 gastrointestinal tract/liver404
 in pancreatic tumors/pancreatic
 intraepithelial neoplasia405
 in precursors of gastrointestinal
 malignancies401
 Cyclooxygenase-2 (COX-2)823
 in OPN-induced prostate tumor
 progression823
 Cytokines163
 modulation of erythropoiesis by163
 Diabetes71,508
 auto-immunity in71
 by ER stress-mediated -cell death73
 ER stress/ -cell death in patients with74
 in Wolfram syndrome73
 metformin in511
 microvessels in508
 Diabetes mouse model75
 by ER stress mediated -cell death75
 Diabetic atherosclerosis506
 metformin in511
 neovascularization in506
 VASA vasorum neovascularization in507
 vascular remodeling of506
 Drosophila pRb-E2F pathway706
 E2F731
 gene alterations in human cancer731
 in apoptosis739
 in modulation of tumor development734
 in proliferation739
 in transcription739
 mechanisms of tumor suppression by735
 oncogenic properties in mouse models732
 regulation of transcription by739
 to promote/inhibit apoptosis743
 tumor suppressive properties in
 mouse models.....731,733
 Endocannabinoid677
 in disease states677
 in progressive neurodegenerative
 disorders679
 mechanisms of protection by681
 medicinal indications of678
 pharmacology of678
 response enhancement of677
 Endoplasmic reticulum (ER)5,71,119
 activation of Gadd153 in123
 alterations in glucose-related proteins
 (Grps) expression in122
 as subcellular site for protein synthesis/
 folding120
 associated degradation system120
 for calcium storage in cell120
 in accumulation of -amyloid peptide119

- in Alzheimer's disease119
 activation of proximal stress sensors of8
 in disease21
 in health21
 physiological role of120
 stress response of120
 Endoplasmic reticulum stress37,55,71,79,120
 as mechanism underlying exogenous A -
 induced neurotoxicity128
 dependent apoptosis61
 effect of overexpression of wild-type
 SOD182
 in calcium homeostasis120
 in ERAD dysfunction121
 in familial amyotrophic lateral sclerosis79
 in protein folding120
 in transgenic FALS rodents82
 in type 1A diabetes75
 induced apoptosis71
 mechanisms of cellular adaptation in55
 mediated -cell death75
 role in neuronal dysfunction40
 Epidermal growth factor receptor (EGFR)409
 activation by oxidative stress416
 as therapeutic targets for chronic lung
 diseases409
 epithelial-mesenchymal cell
 communication *via*417
 in airway epithelial mucous cell
 metaplasia412
 in asthma pathogenesis411
 in COPD413
 in pulmonary fibrosis410
 in viral-induced bronchitis414
 ligands of409
 Epithelial repair413
 role of EGFR system in413
 ER stress-mediated cell death111
 Erythropoiesis162
 early studies of ineffective162
 modulation by infected erythrocytes164
 modulation by intercurrent infection165
 role of iron in162
 Estrogens359
 classical genomic receptor mechanism
 of action of361
 mechanisms of action359
 non-genomic action of362
 pleiotropic activities of359
 structure of359
 Extracorporeal hemoglobin480
 endogenous protection against toxic
 effects of480
Falciparum malaria162
 erythropoietin in162
 morphological abnormalities in162
 Familial amyotrophic lateral sclerosis (FALS)79
 extrinsic/intrinsic apoptotic pathways in80
 GA fragmentation in82
 role for SOD1 secretion in83
 Fibrinolytics615
 rt-PA-tissue-type plasminogen activator
 (reteplase) as616
 streptokinase as615
 tissue-type plasminogen activator
 (tenecteplase) as617
 t-PA-tissue-type plasminogen
 activator as616
 Follicular lymphoma302
 as multistep oncogenic process302
 FXI865
 Gametocyte225
 gamete antigens in225
 Gametocyte-infected erythrocytes224
 antigens on membrane of224
 Glioblastoma724
 Glucose-regulated protein 78 (GRP78)45
 cytoprotective function of49
 expression of45
 in cancer progression51
 in cancer therapy52
 in drug resistance51
 Glycolytic metabolism895
 consequences of895
 Gut275
 as prototype of self-renewing organ276
 development of275
 general organization of275
 hedgehog signaling in283
 stem cells of278
 TGF- /BMP signaling in282
 WNT signaling in279
 Gut homeostasis275
 in cancer275
 in familial adenomatous polyposis (FAP) ...284
 in intestinal cancer284
 in sporadic colorectal cancer286
 inhereditary non-polyposis colorectal
 cancer (HNPCC)284
 notch signaling during281
 signaling pathways regulating278
 Haemolytic syndromes157
 including blackwater fever157
 Haptoglobin gene481
 activation of macrophage receptor
 CD163 by485
 antioxidant function of483

<i>in vivo</i> studies in man	485	tumor necrosis factor- (TNF-) as	561
polymorphism of	481	white blood cell count (WBC) as	561
role in Ca ⁺² mobilization/IP-3 production ..	485	Insecticide treated nets	261
role in macrophage production of		community acceptance of	263
cytokines	486	cost-effectiveness of	263
to modulates oxidative stress	483	distribution of	264
High density lipoprotein	571	efficacy/effectiveness studies of	262
atheroprotective effects of	574	historical background of use of	261
CETP inhibition for	583	re-treatment of	264
effect of apop-1 milano	584	short long-term immunity of individuals	
in lipid metabolism	572	using	265
pre-clinical evidence of	577	use of	264
treatment options for elevation of	577,681	Intraplaque hemorrhage	479
HIV population	397	clinical significance of	479
predictors of osteoporosis in	397	destabilizes atherosclerotic plaque by	480
HIV-1 infection	623	etiology of	479
effect of NK cells on	625	prevalence of	479
mechanisms of	626	Iron	886
NK cells in	623	effect of HIF-1	886
HSV-1 infection	331	Iron homeostasis	883
induced TLR7 expression in HCECs	331	cellular based	883
Human B cell lymphoma	295	in Alzheimer's disease	885
cellular origin of	295	in Friedreich's ataxia	885
Human papillomaviruses	795	in mutiple sclerosis	885
associated human carcinogenesis	795	in Parkinson's disease	884
functions of viral replication proteins of	796	IRP1/IRP2 in	888
genome organization of	796	prolyl hydroxylase (PHD) in	886
life cycle of	801	role of HIF-1 in	833
Hyperglycemia	484	Tf/TfR in	888
<i>in vitro</i> studies in	484	von Hippel-Lindau (vHL) in	886
Hypoglycaemia	149	Islet cell transplantation	369
epidemiology of	149	clinical results of	371
pathogenesis of	150	islet engraftment in	372
treatment of	150	islet exhaustion in	372
amino acid metabolism in	151	islet isolation in	369
lipid metabolism in	151	islet quality test in	370
Hypoxia	64	role of immunosuppressant	371
to activates IRE1-XBP1 arm	64	Lipoproteins	439
Hypoxia-inducible factor (HIF)	883	and extracellular matrix synthesis/	
Hypoxia tolerance	55	degradation balance	446
mechanisms of cellular adaptation in	55	cell biology of	439
Inflammation	557	effect on endothelial adhesiveness	442
in assessing primary/secondary		effect on endothelial function	439
cardiovascular risk	557	effect on vascular cell proliferation/	
Inflammatory markers	559	apoptosis	449
cellular adhesion molecules as	560	effect on vasoactive compounds	441
C-reactive protein (CRP) as	559	effects on eNOS/NO levels	439
fibrinogen as	561	in atherosclerosis	439
homocysteine as	560	in atherothrombosis	450
interleukin-6 as	561	receptors involved in intracellular lipid	
interleukin-18 as	560	accumulation in vascular wall	443
MCP-1 as	560	Low-density lipoprotein (LDL)	439
		induced vascular cell apoptosis	450
		induced VSMC proliferation	449
		receptor family of	443

- retention/modification of442
- scavenger receptor family of446
- Low-grade astrocytomas645
 - based tumor development645
 - genetic changes in645
- Lung cancer339,783
 - germline Rb mutations in784
 - microRNAs in342
 - mouse models for788
 - novel targets for siRNA-based therapy of342
 - p16 alterations in790
 - Rb regulatory pathway in786
 - retinoblastoma regulatory pathway in783
 - role of Rb family proteins p107/p130 in785
- Lymphoma291
 - control of B cell growth in291
 - differentiation in291
- Magnetic resonance imaging541,549
 - molecular assessment by541
 - of atherosclerotic plaques541
 - of molecular components in atherosclerotic plaque544
 - plaque imaging/characterization using541
 - technique for541
- Malaria 141,169,187,205,231,247,253,261,269,309
 - acidosis in142
 - acquired immunity to toxins in213
 - adjuvants for322
 - AMA-1 for321
 - antibodies in174
 - antigen processing/presentation in177,234
 - anti-malarial drugs to control253
 - as complex disease169
 - asexual/blood-stage vaccine
 - candidates for235
 - attenuated whole organisms for322
 - CD4⁺ T cells in172
 - CD8⁺ T cells in171
 - cell-mediated immune responses in197
 - clinical immunity to205
 - clinical/epidemiological studies of215
 - combination therapy in250
 - computational analyses of *Plasmodium* proteins in317
 - cytokines in173
 - decrease t tissue oxygen supply in146
 - development of natural immunity to188
 - drug-resistance in248
 - drugs for311
 - during pregnancy269
 - emerging/experimental drugs for314
 - epitope vaccine against319
 - erythrocytic vaccines against320
 - genetics of314
 - genome research of317
 - hyperlactatemia in142
 - hypoglycemia in149
 - hypothetical mechanisms of pre erythrocytic stage immunity in170,249
 - immunoregulation for209
 - immunoregulatory processes in211
 - implications for vaccines216
 - innate immune responses in196
 - intermittent preventive treatment for255
 - mechanical hypotheses of141
 - mechanisms of clinical immunity to207
 - mechanisms of pre-erythrocytic stage immunity in170,171
 - metabolic complications in141
 - mode of action of drugs for314
 - MSP-1 for321
 - MSP-3 for321
 - parasite life cycle of309
 - pathogenesis of141
 - pathology of310
 - phenomenon of acquired immunity to205
 - phenotypes of315
 - physiopathological mechanisms of270
 - pre-erythrocytic stage immunity in169
 - pre-erythrocytic vaccines against319
 - prevention of261
 - prophylaxis for313
 - protection against pregnancy-associated191
 - role of circumsporozoite protein (CSP)320
 - role of genes309
 - role of genetic markers314
 - role of LSA-1320
 - role of LSA-3320
 - selection for resistance in248
 - sexual combination of309
 - shock in144
 - site of immune induction in177
 - spread of resistance in256
 - T cells in171
 - therapeutic treatments for253,309,313
 - tissue oxygen consumption in146
 - tolerance to toxins in212
 - toxin theories of142
 - transmission-blocking malaria vaccines for237,321
 - tretments of hyperlactateima/acidosis in ...148
 - using ITNs261
 - vaccine development for231
 - vaccines against309,319
 - Malaria parasites169,187
 - antigen source/apoptosis in179
 - asexual blood-stages of187
 - immune responses against/surface169,187,191
 - naturally acquired antibody responses against189
 - pre-erythrocytic stages of169
 - protective immunity in179
 - Malignancy282
 - TGF- /BMP signaling in282
 - Malignant neoplasms685
 - desmoplastic stromal reaction in689
 - role of tumor-associated macrophages

(TAM) in	688	molecular mechanisms of	651,658
stromal-parenchymal interactions in	685	particle size of	656
Mammalian cells	895	physicochemical determinants of	654
glycolytic metabolism in	895	surface treatment of	656
Mammals	705	synthesis of	657
pRb-E2F network in	705	toxicological effects of	654,658
Medulloblastoma	725	uptake of	652
in cellular senescence	725	Neovascularization	457
Melanoma progression	824	angiogenic process of	459
metastatic gene in	824	in advanced atherosclerosis	463
Mesenchymal stem cell progenitors (MSCs)		in early atherosclerosis	463
pathways/molecules involved in osteoblast		in human atherosclerosis	457
differentiation of	811	in intra-plaque hemorrhage	470

- NES-CRE 1 mice for768
- origins/progression of759
- transgenic viral oncoprotein models for763
- tumor suppressor pathways in795
- Retinoblastoma protein809
 - in osteoblast differentiation809
 - in osteosarcoma809
 - osteoblast differentiation in810
- Retinoblastoma tumor suppressor protein
 -705,713,719,749
 - as transcriptional repressor713
 - assembles multimeric protein
 - complexes of713
 - cell cycle apoptotic functions of714
 - effect of cell cycle/apoptotic decisions713
 - effects on chromatin structure753
 - from flies/worms705
 - functional inactivation in cancer749
 - in apoptosis719
 - in cell cycle deregulation at G2/M
 - transition753
 - in centrosome duplication cycle754
 - in genomic integrity750
 - in maintaining genomic integrity in an
 - organism754
 - in model organisms705
 - in replication fidelity753
 - in senescence of non-neuronal/
 - neuronal cells719
 - mechanisms of751
 - multiple functional domains of713
 - physiologic functions of714
 - regulated by stepwise phosphorylation713
 - role in maintenance of genome integrity ..749
 - role in melanocyte differentiation/survival ..716
 - role in oncogenesis719
 - role of cell cycle deregulation in S-phase ..751
 - role of E2F1 regulation in anti-apoptotic
 - activity of720
 - to regulate apoptosis720
- Severe malarial anemia155
 - as public health problem155
 - clinical features of157
 - effective erythropoiesis in161
 - features of156
 - hematological features of157
 - loss of erythrocytes in159
 - loss of uninfected erythrocytes in160
 - pathophysiology of158
 - role of ineffective erythropoiesis in161
 - role of spleen160
 - treatment for165
- Sexual-stage specific immunity223
- Small RNAs339
 - delivery options for therapeutic344
 - in cancer340
 - in non-small cell lung cancer339
 - therapeutic considerations for341
 - tumor growth inhibition by341
- Solid cancers359
 - antiestrogenic therapies in359
 - selective estrogen receptor downregulators
 - (SERDs) in363
 - selective estrogen receptor modulators
 - (SERMs) for362
- Statin589
 - chemical properties of591
 - clinical importance of593
 - decreased inflammation by597
 - increased endothelial-dependent
 - vasodilation by596
 - mechanisms to reduce atherosclerosis594
 - structural differences of591
- Sudden unexplained perinatal death (SUPD)429
- Synthetic peptides631
 - clinical application of631
 - effect on CD28/CTLA-4633
 - effect on regulatory T cell populations638
 - immunological tolerance using631
 - induced tolerance631
 - mechanisms of631
- T cells844
 - in transplantation844
- T cell tolerance631
 - alterations in T cell signaling
 - associated with637
 - CD40-CD154 interaction in634
 - imaging of638
 - induction of631
 - kinetics of costimulation during
 - induction of635
 - molecular basis for633
 - phenotype of636
 - role of peptide antigen632
- TAGE (toxic AGEs) theory351
 - in diabetic complications351
 - production route of354
 - theory of355
- Tau protein phosphorylation424
 - muscarinic receptors in425
 - nicotinic receptors in424
- Thrombin491
 - as thread of inflammation/thrombosis491
- Tissue factor (TF)859
 - alternatively spliced soluble isoform of862
 - circulating type862
 - membrane spanning of862

- Tissue factor pathway inhibitor864
 modes of attachment of864
 on membrane surfaces864
- TLR2329
 as sensor of diverse PAMPs329
- TLR3331
 induce antiviral response by331
- TLR4330
 as sensor for gram-negative bacteria330
- TLR5330
 recognizes flagellin330
- TLR9331
 sensor for bacterial/viral CpG DNA331
- Toll-like receptors327
 for recognizing microbial cell wall PAMPs329
 for recognizing nucleotide PAMPs330
 in regulation of adaptive immune response334
 in secretion of anti-microbial peptides (defensins) in cornea333
 ligands for328
 negative regulators of signaling pathways of334
 role in corneal innate immunity327
 signaling pathways of332
- Transplantation846
 1B1 in851
 B7h pathway in847
 B7-H3 pathway in849
 CD27/CD70 in851
 clinical trials of854
 HVEM/LIGHT/BTLA in853
 OX40 in851
 PD-1/PD-L pathway in848
 targeting CD28 family members in846
 targeting of TNF/TNFR family members in850
 therapies for induction of tolerance in854
- Transplantation tolerance843
 costimulatory molecules as targets for843
 induction of843
 mechanisms of844
 T cell activation in843
- Tumor progression55
 tumor hypoxia in55
- Tumor stroma690
 as therapeutic target in oncology690
- Uncomplicated malaria313
- Unfolded protein response5,37,58,79
 adaptive signal transduction mechanisms for10
 ATF6 in10
 in familial amyotrophic lateral sclerosis79
 in Prion-related disorders37
 in transgenic FALS rodents82
 IRE1 in11
 IRE1 in5
 pathways downstream of ATF4 in17
 PERK in13
 PERK in5
 PERK in58
 phosphorylation of NRF2 in17
 recognition of6
- Vaccination804
 in HPV associated disease804
- VASA vasorum457
 in health/disease457
 structure/distribution of457
- Vascular calcification515
 abnormalities of mineral metabolism in520
 activation of osteogenesis in516
 detection/significance of521
 due to inflammation521
 in cardiovascular system515
 locus of515
 loss of molecular inhibitors of519
 mechanisms of516
 molecular determinants of515
 role of RANKL/RANK/OPG regulatory axis in518
- Vascular endothelial cell growth factor (VEGF)831
 immunomodulatory role of831
 in airway remodeling831
 in angiogenesis832
 in microvascular remodeling832
- Viral E6 protein796
 cellular targets of796
- Viral E7 protein797
 cellular targets of797
- Viral oncogene804
 functions of796
 mouse model systems for804
- Viral oncolysis345
 additive antitumor outcome by345
- Vulnerable plaque490
- Wolcott-Rallison syndrome73
 by mutations in EIF2AK3 gene encoding PERK73
