

SUBJECT INDEX TO VOLUME 3

ADP-ribosyltransferase (ADPRT)/poly(ADP-ribose)	
polymerase-1(PARP-1)	9
and cancer risk	10
computational algorithms/function of	14
enzyme activity of	10
genetic regulation of	9
genotype/function relationship of	13
in aging	9,10
in cancer susceptibility	9
model systems of	10
single-nucleotide polymorphisms (SNPs) of	13
ADPRT/ PARP-1 pseudogene 1 (ADPRT1/ PARP1P1)	10
Age-related and degenerative diseases	147
implications of pharmacological intervention in	147
treatment of	147
use of antioxidants	147
Aging	136
animal models of	137
effect of caloric restriction	143
implications for pharmacological intervention in	147
<i>in vivo</i>	136
model for modulation of life span	143
replicative senescence in	136
role of antioxidant enzymes for resistance against	137
use of <i>Caenorhabditis elegans</i>	138
use of drosophila/flies	139
use of mammals/rodents	140
Aminoglycoside	259
identification of ribosomal binding site for	260
mechanism of suppression by	259
mediated suppression of translation termination in prokaryotes	259
prokaryotic bias for action of	261
suppress stop codons in prokaryotes/eukaryotes	259
suppress/stop/codons in eukaryotes	259
to suppress stop mutations in human diseases	262
use in suppression therapy to treat cystic fibrosis	262
Anticancer therapy	3
dihydro-pyrimidine dehydrogenase target for	4
enzymes of pyrimidine metabolism targets for	3
role of yeast	4
thymidine/uridine phosphorylase target for	4
thymidylate synthase target for	4
Antidepressants	160
adverse effects of	161
induced mania in bipolar disorder	160
induced nausea	160
induced postural hypotension	160
related hyponatraemia	160
Antidiabetic therapy	125
pharmacogenetics of	125
Antimetabolite chemotherapy	1
metabolism of pyrimidines target for	1
target for	1
Antioxidants	133
Anxiolytic	161
induced memory impairment	161
APOBEC3G	98
host cell restrictive factors by	101
interplay between vif and	98
mechanism of action of	98
virion packaging of	98
Aripiprazole	305
chemistry of	309
effect in response to genetic variation in 5-HT _{2A} /5-HT _{1A} receptors	311
mode of action in psychosis	308
mode of therapeutic action in psychosis	310
molecular targets for	308
pharmacogenetic variation of	312
pharmacokinetics of	312
structure activity relationship of	309
Asthma	181
novel therapeutic candidates in	181
Benzodiazepine	161
induced memory impairment	161
recommendations for future pharmacogenetic study of	161
Bilirubin	21
and genome	21
conjugation of	23
effect of blood group incompatibilities	24
effect of G-6-PD deficiency	25
effect of heme oxygenase	28
effect of hemolysis	24
effect of hereditary spherocytosis	27
effect of pyruvate kinase deficiency	27
elimination of	22
enterohepatic circulation of	23
formation of	22
genetic control of production/conjugation of	24
genetics of conjugation of	29
physiology of	22
production of	23
production/conjugation of	21
reduction of biliverdin to	28
role of UGT gene	29
uptake into hepatocyte	29
Biomarkers	184
in clinical development	184
Bladder cancer	165
acetylation phenotyping of	167
effect of high risk occupations	165
genetic susceptibility of	165
genotyping of	167
Cardiovascular disease	182
novel therapeutic candidates in	182

Codeine	44	Drug response	179
metabolism of	44	genes genetic variations in	179
pharmacodynamics of	45	in asthma	179
pharmacokinetics of	45	in cancer	184
Crigler-Najjar syndromes types 1/2	35	in CNS	183
Cyclophilin A	105	in diabetes	183
modulation of restriction by	105	in obesity	183
Dihydrocodeine	46	in shizophrenia	184
metabolism of	46	of serotonin transporter (SERT)	184
pharmacodynamics of	47	to epidermal growth factor (EGF) receptor	
pharmacokinetics of	46	family	184
DNA methylation	74	Drug targets	307
in T-cell function	74	genetic variation in	307
DNA microarrays	201,289	Exosomes	108
analysis of data of	291	G-6-PD	25
as predictive markers of therapeutic response	296	and hemolysis	25
based gene expression profiling	289	function of	25
clinical use of	298	genetics of deficiency of	26
clinical validation of	300	G-6-PD heterozygosity	27
dangling ends in	224	in neonatal jaundice	27
effect of cation	229	Gene-environment interactions	61
effect of molecular crowding	229	identification of	61
effect of pH	229	Gene expression	73
factors affecting thermodynamics/kinetics of	229	regulation of	73
G/C-rich sequences of	218	Genetic model	1
hairpin loops in	224	in anticancer therapy	1
in assessing prognosis	289	<i>Saccharomyces cerevisiae</i> as	1
in breast cancer	202	Genome wide association mapping	178
in cancer aiding	289	Gilbert's syndrome	30
in cancer diagnosis	289	clinical aspects of	30
in determining prognosis	294	in Asian populations	34
in diagnosis	293	in Caucasian populations	30
in gastrointestinal cancer	205	TA promoter polymorphism in	30
in lung cancer	204	Heritability	55
in lymphoma	207	and disease genetics	58
in predicting response to therapy	289	methods for estimation of	55
in reproducibility	298	RDA method for	56
in standardization	299	twin studies of	55
in translational cancer research	201	HIV-clade independent CTL epitopes	253
internal loops in	224	computer-based selection of	253
junctions in	224	for monitoring HIV-specific immunity	253
kinetic analysis of	226	HLA class I/II molecules	247
mismatches in	224	structure of	247
non-Watson-Crick base pairs of DNA of	226	HLA-haplotype	253
polypurimidine-polypyrimidine sequences of	220	computer-based selection of	253
processing of tumor tissue in	290	for monitoring HIV-specific immunity	253
quantitative analysis of	223,229	HLA-peptide interaction	249
reliability/reproducibility of data of	208	to predict T-cell epitopes	249
RNA in	220	Hydrocodone	48
role of	201	metabolism of	48
triplexes/quadruplexes in	225		
types of	289		
Watson-Crick base in double helix of	223		
Drug induced lupus	75		
DNA methylation in	75		
Drug metabolizing enzymes	43		
variability of	43		

pharmacodynamics of	48	myeloperoxidase (MPO) in	323
pharmacokinetics of	48	NAD(P)H quinone oxidoreductase 1 (NQO1) in	323
Hyperbilirubinemia	30	other polymorphisms in	324
abnormalities of UGT1A1 leading to	30	other tumor suppressor genes in	328
Hypermutation	97	P53 polymorphisms in	322
Hypertension	271	staging of	319
characteristics of	271	XRCC in	324
genetic contributions in African Americans	272	Microbial T-cell epitopes	247
management in African Americans	274	characteristics of	247
pathophysiology in African Americans	271	for immune-diagnosis	247
Hypertensive pharmacogenomics	271	for immune-therapy	247
in African Americans	271	for vaccine design	247
Idiopathic lupus	76	in HIV	254
DNA methylation in pathogenesis of	76	in malaria	254
Immunodiagnosis	253	in tuberculosis	254
of active tuberculosis	253	selection of	247
Inherited hyperbilirubinemia	37	Monoubiquitination	109
gene therapy for	37	Mood stabilizers	161
Japanese type 1 diabetes	191	induced skin rash	161
CTLA-4 gene in	192	Multigenic traits	63
epidemiology of	191	in pharmaceutical risk assessment	63
genetics of	192	Multivesicular body sorting pathway	107
genetic polymorphism of	195	and cell type dependence	111
HLA genes in	192	targeting of	111
insulin gene in	192	Neonatal hyperbilirubinemia	36
molecular genetics of	191	due to other UGT1A1 coding area mutations	36
non-HLA region genes in	192	therapeutic implications of	37
other non-MHC genes in	194	Neonatal jaundice	21
prevention of	195	kernicterus in	21
Lindage disequilibrium	177	Nonsense suppression therapy	266
role of hap map data	177	development of alternative drugs for	266
Linkage mapping	178	Novel anti-HIV-1 therapeutics	97
in common disease	178	effect of entry dependent restriction	106
Lipids	108	effect of Fv1 mediated restriction in mice	101
Longevity	145	effect of Lv1 mediated restriction in primates	102
effect of insulin metabolism	145	effect of Ref1 mediated restriction in humans	102
Lung cancer	319	effect of species specificity	104
alteration of Rb pathway in	325	endosomal protein sorting in	107
altered expression of cell adhesion molecules in	328	innate immunity in	97
CYP ₄₅₀ in	323	insights for	97
DNA repair genes in	324	intracellular trafficking in	97
ERCC in	324	Lv1 in	103
genes involving apoptosis in	327	Ref1 in	103
genomic instability in	324	role of retroviral late domains	107
glutathione S-transferases in	323	role of viral infectivity factor (Vif)	97
growth factors in	326	targeting late domain motifs	110
histopathological classification of	319	targeting P(T/S)AP	110
identifying biomarkers of	319	targeting PPXY	110
in post-genomic Era	319	targeting YP(X) _n L	110
K-Ras/C-MYC oncogenes in	326	NSCLS	324
microsomal epoxide hydrolase (mEH) in	323	alteration of Rb pathway in	325
molecular alterations in	324	P53 mutations in	324
		Nucleic acid editing enzymes	97

Nucleoside transporters	281	to hydroxy-methylglutaryl coenzyme A (HMG-CoA) reductase	181
genes in	281	to leukotriene modifiers	179
genomics of	281	to multidrug resistance gene 1 (MDR1)	182
polymorphisms in	282	to thiopurine <i>S</i> -methyltransferase (TPMT)	183
post-translational modifications of	284	Pharmacogenomic components	305
promoter analysis of	282	candidate pathway strategy for	305
proteomics of	281,283	in antipsychotic treatment	305
structure of	283	integration of	305
targeting	284	Pharmacokinetic pathways	307
transcriptional regulation of	282	genetic variation in	307
Opioids	44	Pharmacology	54
metabolism of	44	graded approach to estimation of heritability in	54
pharmacodynamics of	45	priority levels for	54
pharmacokinetics of	45	Physiological jaundice	23
Oxidative stress	130	causes of	24
animal models of	137	of newborn	23
implications for pharmacological intervention in	147	Placenta	23
role of antioxidant enzymes for resistance against	137	Polymorphic cytochrome P ₄₅₀ 2D6 isozyme (CYP2D6) ...	43
role of reactive oxygen species (ROS)	130	effects on opioid kinetics	43
telomeres in replicative senescence in	131	effects on opioid metabolism	43
Oxycodone	47	effects on opioid response	43
metabolism of	47	genotyping of	44
pharmacodynamics of	48	phenotyping of	44
pharmacokinetics of	48	polymorphism of	43
<i>Papaver somniferum</i> L	44	PPAR α	121
alkaloids of	44	gene function of	121
PGC-1 α	124	gene structure of	121
gene function of	124	nutrient interaction of	121
gene structure of	124	role of PPAR α	121
nutrient interaction of	124	PPAR γ	122
Pharmacogenomics	53,275	gene function of	122
application of RDA method in	59	gene structure of	122
biomarker bridging studies in	60	nutrient interaction of	123
discovery of molecular genetic variants in	60	Premature stop mutations	259
multigenic control of drug response in	53	decrease aminoglycoside toxicity in	266
of antihypertensive therapy in African Americans	275	diseases models used to test suppression therapy of	265
regulatory decision-making in	53	genetic diseases by	259
societal/ethical/therapeutic policy considerations in	60	improve aminoglycoside potency in	266
upper-bound estimate of genetic contributions in	53	pharmacological suppression of	259
Pharmacogenomic approaches	177	suppression of	264
application of	177	to treat duchenne muscular dystrophy	264
in study of drug response in complex disease	177	Psychotropic drugs	157
to ApoE	181	induced adverse effects	157
to beta1-adrenergic receptor blockers	181	induced adverse effects	160
to beta2 adrenergic receptor (β 2AR)	179	induced agranulocytosis	159
to cholesteryl ester transfer protein (CETP)	181	induced extrapyramidal syndromes	157
to corticotrophin releasing hormone receptor 1	179	induced weight gain	158
to CYP 2C19	182	pharmacogenetic studies of	157
to CYP 2D6	182	recommendations for future pharmacogenetic study of	161
to drug metabolism/transport	182	RDA analyses	62
to glucocorticoid receptor	179	integration of	62
to HER2/Neu	184	in regulatory decision-making	62

Retroviruses	108	T-cell epitopes	253
hijack of cellular MVB pathway for viral		in diagnosis monitoring of infectious diseases ...	253
assembly by	108	of helper T lymphocytes (TH)	253
		of microbial-specific cytotoxic T-lymphocytes	
		(CTL)	253
Saccharomyces cerevisiae	2	Telomeres	129
model system for <i>in vivo</i> effects of antimetabolite		and replicative senescence	130
chemotherapy	2	as biomarkers for antioxidant properties	134
Schizophrenia	308	as biomarkers for human diseases	136
partial dopamine agonists for treatment of	308	in longevity	129
Senescence	129	in senescence	129
<i>in vitro</i>	129	in stress dependent telomere shortening	132
Single nucleotide polymorphisms (SNP)	237,322	role for antioxidants	129
association with cancer risk	322	role in oxidative stress	129
biotechnological outlook of	237	signal senescence <i>via</i> DNA damage foci	
detection in human genome	322	formation	132
history of	237	specific repair deficiency of	132
post-ERA of	241	Tissue cryoarrays	320
practical applications of	237	Tissue microarray	320
practical applications of	242	applications of	320
pre-ERA of	238	construction of	320
prospective of	243	quantitative analyses of	321
Surfactant protein A (SP-A)	87	technical consideration for array construction in ..	320
as innate immunity gene	92	Tramadol	49
as surfactant-related gene	92	metabolism of	49
characteristics of	87	pharmacodynamics of	49
coding region of	88	pharmacokinetics of	49
gene duplication of	92	TRIM5 α	103
genetic diversity of	87	species-specific variants of	103
heterogeneity of	90	TRIMCyp	105
implications in disease/drug response	91	paradoxical monkey	105
innate host defense by	87	Type 2 diabetes	119
locus heterogeneity of	87	gene-nutrient interaction in	119
novel regulatory mechanisms of	93	role of peroxisome proliferator-activated	
primary function of	87	receptor pathway in	119
protein structure of	90	role in PGC-1 α	124
significance of	87	role of PPAR γ	122
surfactant-related functions of	87	UGT1A1 coding area	36
Surfactant protein (SP)-A1	87	and G-6-PD deficiency	36
implications in disease/drug response	91	mutations of	36
qualitative/quantitative differences between	90	Unconjugated neonatal hyperbilirubinemia	21
Surfactant protein (SP)-A2	87	and genome	22
implications in disease/drug response	91	breast feeding and	24
qualitative/quantitative differences between	90	hereditary basis of	21
qualitative differences between SP-A1 and	90	racial/familial/environmental influences of	24
qualitative differences between SP-A1 and	90	Virion release	109
Systemic lupus erythematosus	73		
DNA methylation in	73		
pathogenesis of	73
