

SUBJECT INDEX TO VOLUME 2

Acquired thrombophilia	62	Endocrine disorders	147
Androgens	75	Endogenous infection	146
availability of	80	Epidural labour analgesia	223
biosynthesis/metabolism in women	76	outcome of	223
clinical studies of	81	Episiotomy	99
in pre/postmenopausal women	79	advantage/disadvantage of	101
in women sexual function/dysfunction	75	recommendations for	102
insufficiency in women	80	resistance to	101
physiology in women	75	scientific evidence of	99
plasma binding proteins of	80	strategies to	101
preclinical studies in animal models	83	use of	99
Anticoagulation	62	Estrogen	198
APOE genotype	87	clinical effects of	198
polymorphisms of	88	effect on body weight	198
Assisted reproductive technology (ART)	249	effect on bone mineral density	198
multiple gestations following	249	effect on cardiovascular system	201
Blood lipid parameters	87	in breast cancer	200
gender specificity of	87	in cancers	201
genetic variation of	87	in fractures	198
Brain damage	271	in hip fractures	200
Breast cancer	136	Evidence based practices	173
DSB repair surveillance by	136	implementation of	173
Breast tumor	138	in maternal/perinatal care	173
links between <i>TP53</i> gene alterations/genome		in women care	173
destabilization during	138	interventions to improve	173
Caesarean	193	Female sex hormones	63
section patterns of	193	Female sexual function/dysfunction	75
Cesarean delivery	224	Fibrinolysis	61,62
Chorioamnionitis	271	Gene therapy	150
Chronic disease	125	Genomics	149
Cloning DNA	149	Grand multiparity	25
Coagulation	61,262	Gynaecological cancers	148
Comparative genomic hybridization	149	Hemoglobinopathies	41
DNA polymorphism	149	in pregnancy	41
DSB repair dysfunction	135	Hemostasis	51,64
effect on mammary tumor development	135	changes with HRT	65
Embryonic stem cell	150	with OC	64
Emergency contraception	33	Hormone sensitive lipase (HSL)	89
antiprogestogens in	35	Human genome	148
combination of estrogen/progestin in	34	Hysterectomy	128
copper IUD in	36	Iatrogenic infections	146
danazol in	36	Immune system	261
methods of	33	<i>In situ</i> hybridization (ISH/FISH)	149
over-the-counter availability of	37		
progestogens in	34		

<i>In vitro</i> fertilization (IVF)	239,249	in cardiovascular diseases	127
and multiple gestations	250	in depression	125
cancer risk of	243	in musculoskeletal diseases	127
chromosome anomalies by	242	in osteoarthritis	127
congenital malformations by	241	in osteoporosis	127
effect on health of mother/offspring	239	in rheumatoid arthritis	127
limitations of	243	relief of	130
risks associated with	240	Microbiota	104
Inactivated vaccines	187	of urogenital female tract	104
against bacterial diseases	188	Multiple gestations	249
against viral diseases	189	cleavage stage/blastocyst stage transfer in	251
in pregnancy	187	costs related to	250
Inflammation	262,271	effect on controlled ovarian hyperstimulation (COH)	250
Inherited thrombophilia	63	elective single embryo transfer (SET) in	252
Instrumented vaginal delivery	225	embryo morphology in	251
Intra-cytoplasmic sperm injection (ICSI)	239	neonatal/maternal risk associated with	249
cancer risk of	243	patient characteristics in	252
chromosome anomalies by	242	preimplantation genetic screening (PGS) in	251
congenital malformations by	241	Nonfamilial breast cancers	137
limitations of	243	DSB repair defects in	137
risks associated with	241	Normal pregnancy	260
Labour	193,255	apoptosis in	262
for post maturity	193	immunology of	261
time progression of	225	inflammation in	266
timing of induction of	193	initiation of labour in	263
Lactobacillus	112	progesterone receptors in	260
anti-tumoral effect of	112	role of placental corticotropin releasing hormone in	264
as vaccine vectors	112	role of progesterone in	260
effect on group B streptococcus infections	112	Nucleic acid blotting	150
Light-induced fluorescence (LIF)	207	Ovarian cancer	148
as promising technology in obstetrics	207	Ovarian wedge resection	91
benefits of	219	p53	133
induction effect of	215	counteracting mammary tumor development	133
prediction of labor by	213	double strand break repair activities of	133
studies in animals	216	enhancement of topoisomerase I-dependent recombination by	135
studies in humans	213	repression of mutagenic DSB repair by	134
Lung damage	271	role in recombinative repair	134
Lymphocytic choriomeningitis virus	229	tumor suppressor function of	133
acquired infection by	229	Parturition	260
as neglected teratogenic zoonosis	229	role of progesterone in	260
congenital infection by	230	progesterone receptors in	260
diagnosis of congenital infection of	230	PCR	149
epidemiology of	229	Periodontal disease	272
Maternal thrombosis	54	Polycystic ovarian syndrome (PCOS)	91,147
risk factors for	54	Postmenopausal hormone therapy	197
Maternity waiting home (MWH)	235	androgens in	197
in rural districts in Africa	235	estrogen in	197
Menopause	145,197		
Menopausal transition	125		
AGE of	129		
effect of chronic diseases on	125		
genetic factors for	129		
in Alzheimer's disease	128		

Pregnancy	41,51,187,208	in breast cancer	200
acquired thrombophilia in	53	in cancers	201
anticoagulation in management of thrombophilia		in fractures	198
in	56	in hip fractures	200
hemoglobin C disease in	46	Proteomics	149
hemoglobin E disease in	46		
hemostatic changes in	52	Reproductive dysfunction	145
high-affinity hemoglobins in	48	diagnosis of	145
inherited thrombophilia in	53	Reproductive/therapeutic cloning	152
maternal/fetal implications in	51		
miscarriage in	42	Safe motherhood	235
monitoring during	208	Secondary recurrent miscarriage	119
pathophysiology of sickle cell disease in	41	chromosomal abnormalities in	121
post-partum complications in	42	differences in treatment efficacy between	
safety of inactivated vaccines in	187	primary and	121
sickle cell disease in	41	epidemiological issues of	120
thalassemias in	47	etiology of	119
transfusion therapy in	45	HLA allele prevalence in	121
urinary tract infections in	44	immunological disturbances in	121
Premature ovarian failure (POF)	148	inherited thrombophilic defects in	121
Preterm birth (PTB)	257	prevalence of risk factors in primary vs.	120
bacterial dissemination in	272	treatment of	119
categories of	272	uterine/endocrine abnormalities in	120
consequences of	258	Sexually transmitted infections (STIS)	146
COX inhibitors	299	Sickle cell disease	41
cytokines in	273	fetal implications of	43
epidemiology of	257	management of pregnancy in	44
ethnic differences in	257	maternal mortality in	42
factors associated with	264	obstetric complications in	42
financial burden of	260	obstetrical/fetal monitoring in	44
gene polymorphisms in	277	sickle cell trait in	46
infant mortality in	258	treatment of	44
long-term consequences for survivors of	259	types of	41
magnesium sulphate in	299	Single nucleotide polymorphisms	87,150
major morbidity in	259	gender specificity of	87
nitric oxide donors in	300	genetic variation of	87
nonsteroidal anti-inflammatory drugs		Somatic cell nuclear transfer (SCNT)	151
(NSAID) in	299	Surgical menopause	128
pathogenesis of	272	Surgical sterilization	15
prediction of	286	antecedents of	15
receptor blockers in	299	contraceptive use in	18
smoking in	274	demographics studies of	17
stress in	274	in Tamil Nadu	15
twins/triplets in	260	reproductive health knowledge of	19
Probiotic	103	sex distribution/preferences in	18
assays in human beings	111	Thalassemia	47
definition of	103	pathophysiology of	47
<i>in vivo</i> studies in experimental models	111	Thrombophilia	51,61
technological properties of	110	and female sex hormones	61
Progesterone/progestagens	165	in pregnancy	51
formulations/routes of administration of	167	risk of maternal thrombosis	54
side effects of	168	screening for	56
teratogenicity of	168		
to prevent preterm birth	165		
use to prevent preterm labor/preterm delivery	166		
Progestins	198		
clinical effects of	198		
effect on body weight	198		
effect on bone mineral density	198		
effect on cardiovascular system	201		

Transgenic animals	150	antibiotic prophylaxis for	7
Transplantation	181	autologous bladder mucosa interposition	
implications for obstetricians	181	graft in	12
Transvaginal hydrolaparoscopic ovarian drilling	91	classification of	156
for infertile women with polycystic ovary		clinical features of	4
syndrome	91	clinical presentation of	157
		congenital type	156
		conservative management of	6
		conservative treatment for	159
		diagnostic procedures of	6
Umbilical cord blood (UCB)	181	electrocautery in	7
donor selection for	182	etiology of	156
implications for obstetricians	181	evaluation of	158
influence of mode of collection on quality of	182	fibrin glue in	7
role of obstetric factors in	183	flap-splitting techniques for	9
Urogenital pathologies	104	full-thickness fasciocutaneous Martius flaps in	11
cervicitis as	105	gracilis muscle flap in	12
consequences of	104	histologic findings in	5
conventional treatments applied to	105	history of	155
therapeutic measures in	105	interposition flaps/grafts in	10
vaginitis as	105	investigations of	6
vulvovaginitis as	105	laparoscopic approach in	10
Urogenital tract	106	Latzko partial colpocleisis procedure for	8
benefits of probiotic bacteria on	106	management of	3
Urogenital tract infections	103	Martius flap in	11
antibiotic therapies for	105	omental J flap in	12
application of homemade/non-conventional		pathology of	4
preventive therapies for	106	pathophysiology of	155
conventional treatments applied to	105	peritoneal flap in	12
mechanisms of	103	peritoneal flap in	12
probiotics in prevention of	103	preoperative/intraoperative management of	159
therapeutic measures in	105	rectus abdominis muscle flap in	12
Uterine electromyography (EMG)	207	risk factors for	157
as promising technology in obstetrics	207	route of surgical repair in	160
benefits of	219	surgical procedures for	8
induction effect of	211	surgical therapy for	7
prediction of labor by	211	surgical treatment for	159
studies in animals	212	symptoms of	157
studies in humans	211	techniques of repair in	8
		transperitoneal technique for	10
Vascular endothelium	62	transvesical extraperitoneal technique in	9
Vesicovaginal fistulae	3,155	treatment for	6
abdominal approach for	9	vaginal approach interposition grafts/flaps in	11
abdominal approach interposition grafts/flaps in ...	12	vaginal approach to	8
acquired type	156	vaginal cuff excision for	9
aetiology of	4	Western blotting	150
